NORTHWEST MISSOURI STATE COLLEGE

Vol. 26, No. 33

Maryville, Missouri

July 21, 1967

1967 Summer Commencement Exercises To Be Held Aug. 4

Commencement exercises for the 1967 summer graduating class will be held Aug. 4, at 8 p. m. at Rickenbrode Athletic Field.

The speaker for this summer's commencement is Mr. Henry C. Haskell, associate editor of the Kansas City Star. He is also a member of the Missouri Commission of Higher Education.

The Invocation will be given by Dr. Charles Koerble, dean of students, with Dr. John Smay in charge of music.

There are 136 undergraduates and 41 graduates who have applied as candidates for degrees. President Robert P. Foster will confer the undergraduate honors and a representative from the University of Missouri, will confer the graduate degrees.

A senior breakfast will take place on Aug. 3, at 8:30 a. m.

in the Blue Room of the J. W. Jones Student Union. Dan McLaughlin will introduce President Foster, guest speaker for the breakfast.

home of President and Mrs. Foster from 2 to 4 p. m. the

Open house for all graduating seniors and their wives or husbands will be held at the same day.

All committees for the arrangements are headed by senior class president, Dan McLaughlin, under the guidance of Dr. Frank Grube and Mrs. Elaine Mauzey, faculty sponsors. Those in charge of committees are Gary Curtis, programs; Harvey Hallum, ushers; and Mary Ellen Miller, senior breakfast.

New Psychology Chairman

Dr. Richard Quinn, new psychology department head, reviews his doctoral thesis on "personal and social adjustment changes in school drop-outs."

Dr. Quinn Named Head Of Psychology Section

Dr. Richard Quinn has been appointed chairman of the Northwest Missouri State College department of psychology to succeed Dr. Donald Smith, effective at the beginning of the fall term.

In discussing plans for the department, Dr. Quinn observed that the staff will try to "sustain the impetus established by Dr. Smith." He said that the department will expand as interest in such growth is indicated by the students. New courses will be added to the curriculum as the demand arises with departmental growth.

A native of Albany, Dr. Quinn was graduated from Central High School, St. Joseph. After graduating from MSC with a BS in education degree, Dr. Quinn taught at Sidney, Iowa. Later he taught and coached at Benton High School, St. Joseph.

After he received his MS from Oklahoma State University in 1962, Dr. Quinn served as director of student personnel at St. Joseph Junior College for two years. In 1965 he completed studies for his doctorate in counseling and higher education at Oklahoma State University. Also in 1965 he accepted the post of assistant professor in the department of psychology here.

Dr. Quinn believes that the newly instituted experimental laboratory is functional in that it helps the students make observations of behavior of the animals there under controlled conditions.

The new chairman commented that he and other members

of his staff hope to maintain a close and rewarding relationship with the Division of Education and to continue supporting the work of other MSC departments.

Married to the former Sondra Eirdams, St. Joseph, Dr. Quinn and his wife have two sons, Shannon and Michael, and one daughter, Laura Lee. The family resides in Pickering.

Graduation Timetable

Anytime:

Pay graduation fees (\$13) at Business Office.

After July 24:

Pick up cap and gown in Room 119, Administration Building. Receipt of payment of fees required.

August 3:

Senior breakfast in Blue Room of Student Union, 8:00 a. m. Rehearsal held after breakfast, at both the gym and the Rickenbrode Athletic Field. Tea at President Foster's home from 2 to 4 p. m.

August 4:

Commencement at 8 p. m. Return cap and gown to Room 126, Administration Building immediately after the commencement exercises.

Italian Instructors Visit MSC Campus

Leaving tomorrow after a week on campus are 10 Italian instructors who have been participants in the Experiment in International Living.

During their stay at Northwest Missouri State College, the instructors lived in the residence halls with their student hosts and hostesses.

The week consisted of visits to classrooms, tours around the campus, and developing of friendships among students and faculty members.

On Sunday night, the student hosts entertained their guests at the home of Miss Karen Licklider, dean of women. Dinner was served at the home of President and Mrs. Robert P. Foster on Monday evening. After dinner, a tour of their home was made, followed later by a film.

The instructors made a trip to Kansas City on Wednesday to see the production of "On a Clear Day You Can See Forever" at the Starlight Theater.

The Italian visitors commented that they were getting tired of the bus rides to their various destinations.

MSC Students Study in Mexico

Four MSC foreign language majors are studying in Monterrey, Mexico, six weeks this summer, with Mrs. Harvey White, MSC Spanish instructor, serving as their sponsor.

The students are Misses Janice Ball, Diane Nelson, Linda Sams, and Cheryl Thompson. They will receive six hours of credit for their study.

The objective for this study is for better understanding of many aspects of Mexican culture by American educators.

Miss Mary Jackson sponsored a similar group last year.

Horace Mann Library Expands, Needs Additional Space

Library Acquires Telescope

Anxiously awaiting a turn to use the newly purchased telescope for the Horace Mann library, are Horace Mann students, Debbie Hansen, Julie Richey, Drew Thate, Ted Rounds, Roger Baker, and Renee Tackett.

By Kay Medsker

As a child, did you ever wonder if two cups really equal a pint? With the new dry and liquid measure equipment in the Horace Mann Laboratory School Library, youngsters can now solve this problem for themselves.

Approximately \$12,000 was appropriated last year for improving the library, which is supervised by Miss Carolyn Peterson. The money was obtained by a matching grant from the National Defense Education Act. Miss Peterson stated that an application for the needed items was submitted and approved, the government paying half the cost of the equipment bought.

Money from the NDEA can be spent only to improve teaching and learning in nine areas: Civics, economics, English, geography, history, mathematics, modern foreign language, reading, and science. The Horace Mann Library, while purchasing some new books in all areas, concentrated mainly on science and geography books.

New educational material now found in the library includes a telescope, used by the recent aerospace workshop-

pers, and a weather kit consisting of thermometers, both indoor and outdoor, weather vanes, magnets, hygrometer, barometer, and magnetic compass. Also now in use are new flannel board materials, globes, slides, filmstrips, films, records, tape recordings, a view master projector, and six filmstrip previewers.

Two outstanding new features are a video tape recorder and an overhead projector with transparencies. The video tape recorder automatically tapes a normal classroom situation. The magnetic tape can be saved indefinitely and later shown over the closed circuit television to college students studying behavior patterns of elementary children.

The overhead transparency projectors have several qualities which make them more convenient for classroom use than the regular filmstrip projector.

The transparencies can be seen in a lighted classroom, they can be written on with a grease paint pencil and later erased. Since they are flashed overhead, the teacher does not need to place the projector behind the children.

Other items purchased for the library were an electric (Continued on Page 3)

Business Education Professor Retires From MSC Faculty

One of the most likeable staff members of Northwest Missouri State College, Mr. Clifford Kensinger, will not be teaching this fall.

Mr. Clifford Kensinger

A 21-year member of the business department, he retired this spring because of ill health. One of the highest honors bestowed upon Mr. Kensinger was the dedication of the 1967 Tower to him.

Donald Robertson Directs Art Project

Mr. Donald Robertson, art instructor, is presently in charge of a series of classes for seventh graders interested in painting and drawing.

The classes sponsored by The Nodaway Arts Council and Maryville Park and Recreation Board are being instructed by experienced members of Mr. Robertson's senior methods courses.

The classes are located in the Maryville Public Library.

Mr. Kensinger received his BS in Education from Southwest Missouri State College, Springfield, in 1926, and his MS in Education from the University of Missouri, Columbia, in 1946.

He began teaching at Northwest Missouri in 1946 after 23 years of teaching at the high school level. The business department then had three full-time teachers and offered fourteen hours of accounting. It now has eight full-time teachers and twenty-six hours of accounting.

Kensinger has one special interest, income tax accounting. As most of his students will testify, he is proficient in this field, and is a dependable consultant for anyone needing tax information.

His favorite hobby is gardening. He loves flowers and all other kinds of plants that go with gardening.

Mr. and Mrs. Kensinger, who live in Maryville, have two children, Larry and Linda. Mr. Kensinger's plans for the future include a trip with his wife throughout the Eastern part of the United States.

Society Notes

Married

Julie Lynn Thompson and Thomas Peter Ramsel, both of St. Joseph, were married June 30.

Ruth Price, Fairfax, and Glen Rother, Craig, were married June 24.

Virginia Bright and Mike Thompson, recent MSC graduates, both of Maryville, were married July 1.

Engaged

Charlotte Elaine Kenny to Roland Keith Brown, both of Skidmore.

Northwest State Gives Birth To National Honor Fraternity

By Janice Johnson

The first Greek letter fraternity at MSC was the fulfillment of an idea originated by Miss Mabel Cook, now head of the home economics department.

At a dinner served by the dietetics class in November, 1922, Miss Cook, a senior at that time, suggested the formation of a local club composed of home economics majors. This was put into action—meetings were planned, committees appointed, and necessary steps made to formulate the group.

The organization for Kappa Omicron Phi was completed Dec. 11, 1922, with Miss Hettie Anthony, chairman of the department, as sponsor. Eligibility for membership was determined on the basis of scholarship and personality.

Kappa Omicron Phi is a fraternity of professionally trained women in this field to further the best interests of home economics by developing women with high ideals and a deep appreciation of the home.

In February, 1923, Mrs. Anna Pierce, Warrensburg, stated they would like to organize a chapter if it could be arranged. Installation was held in May. The installing team came away with only one thought—Kappa Omicron Phi must become a national organization.

After writing to every available source, it was found that an organization could become national with the formation of three chapters in two states. The formation of a chapter at Hays, Kan., in 1925, made it a national fraternity, and the first national conclave was held at MSC in 1926. Miss Anthony was elected president and Miss Cook, vice president.

The founder, Miss Anthony, created the design for the pin which is still the official insignia.

Birthplace of Sorority

Miss Mabel Cook is holding a photograph of Miss Hettie Anthony, founder of Kappa Omicron Phi. The furnishings shown, and which decorate Miss Cook's office, were given by the national organization to beautify its birthplace.

signia.

Miss Cook was national president in 1953. This year Sandra (Bill) Taliferro, Wilmington, Del., a graduate of MSC in '59, is president.

Kappa Omicron Phi has grown to include 40 active and 11 alumnae chapters in 19 states. From a small group on the campus of MSC, has grown a national organization of 6,600 members.

To quote Miss Cook, from a statement she made in 1963, "with increased enrollment on

college and university campuses, there is a challenge to college administrators to enrich the experiences of the student and to place renewed emphasis upon high standards of scholarship and the development of leadership. Kappa Omicron Phi is designed to accomplish these goals."

There are 34 active members in MSC's Alpha chapter on campus. Of the original six members, three are living: Mabel Cook, Sarah Toomey, and Dorothy Rowley.

Summer Student Employees Work In Various Areas on Campus

The Stroller overheard a cooing deep sigh of relief the other day just after the sound of screeching brakes. It seems a rabbit ran out in front of a car. As the rabbit scurried away, she commented to her companion, "That's what I call a dumb bunny!"

Surprise could have been on the Stroller's face when she saw a woman carrying three cartons down the second-floor hall of the Administration Building. How were those eggs to be used? Or were there actually eggs in those cartons?

Did you know we have the city of Des Moines yo-yo champion among us at MSC? She coed practices her art during spare moments in the among fascinated friends. She is reported to be seriously considering offering yo-yo lessons at a nominal fee.

The Stroller recently observed a real hero in action. A robin near the Union flutted into the path of a cat. The cat and a college student were attracted simultaneously to the fledgling. The cat caught the robin; however, the student quickly convinced the cat it was wise to release the bird. The little redbreast flew away a bit shakily but unhurt.

Alumni Report

Dr. Donald Barber, a 1946 graduate of MSC, has been promoted to professor with the rank of tenure at St. Mary of the Plains College, Dodge City,

Dr. Barber, presently chairman of the Teacher Education Division, has been a member of the faculty for seven years. Recently he attended a summer institute for educational media specialists held at Virginia College, Petersburg, Va. Barber is serving as vice president of the Kansas State Association for Student Teaching and will automatically become president for 1968.

An MSC graduate, Lt. Lanny Fertig, has recently graduated from the Naval Postgraduate School, Monterey, Calif.

Fertig received a BS degree in mathematics aiding him in coming communications officer of the USS Pocono, an amphibious force flagship.

Fertig entered the Naval Reserve in September, 1960, after graduating from MSC.

Wrought iron fences generally don't write their biographies, but since I reside on the MSC campus, I believe it would be permissible.

I was about 30 when I came to MSC. Previously my birth had been in the late 1870's as a result of Captain Thomas Gaunt's construction. I resided on the front and to one side of Captain Gaunt's yard until the summer of 1967. That summer, by order of the Board of Regents Normal School, I was taken down and sold for \$50 by R. H. Duncan, superintendent of the grounds.

My next home was a farm south of Maryville until President Jones arranged to buy and establish me permanently on college grounds. Now I reside on the southeast side of the J. W. Jones Student Union, but my age doesn't show because they gave me a face lifting.

Sixty years of campus life should entitle me to receive retirement benefits. But who ever heard about a fence receiving social security?

Horace Mann

(Continued from Page 1)
typewriter, a second 3 mm projector, and several filmstrip cabinets, Miss Peterson said.

Besides 8,716 books and subscriptions to 68 periodicals, Miss Peterson stated that the library houses 1,466 filmstrips, 600 records, 450 view master reels, 250 transparencies, 197 tape recordings, 1260 slides, and 95 8 mm films.

With all of the broadened program and new facilities the busy librarian now says her main problem is: Lack of space, a problem that is increasing rapidly.

1967 Football Schedule

Games at home: Sept. 16—Arkansas A. & M. (7:30), Sept. 23—Peru College (7:30), Oct. 7—Drake University (7:30), Oct. 28—Springfield (Homecoming—2:00), Nov. 11—Rolla (2:00).

Games away: Sept. 30—William Jewell, Oct. 14—Kirkville, Oct. 21—Cape Girardeau, Nov. 4—Warrensburg.

Bob Barton, junior, Maryville, sweeps the basement floor of Colden Hall as one of his major duties.

Garold Bateman, graduate student, a teacher in the Omaha school system, has a number of tasks on his part-time job at the snack bar in the dea.

Judy Lybarger, senior, Denison, Ia., works with college catalogs from various colleges and universities in the conference room of the library.

Approximately 370 students are employed this summer by Northwest Missouri State College in the student labor program.

There are over thirty types of jobs in which these students work. The jobs range from secretary to projectionist, houseboy to grader, laboratory as-

sistant to janitor.

The students receive \$1 an hour which meets the Federal Minimum Wage Law. The total amount of gross wages for the month of June was \$17,365.

Of course this figure along with the number of student employees fluctuates each month. However, as Miss Kay Byron, student employment office manager stated, "The work study program is continually increasing."

Work study is a program which provides employment for students whose parents are financially unable to fully support them in college. This summer there are 105 of these workers on campus.

The work study program also provides for employment on and off campus for high school graduates coming to MSC in the fall. Sixty-five off campus people are employed this sum-

mer in Maryville, Albany, Bethany, Hamilton, Chillicothe, Oregon, and St. Joseph. For the year 1967-68, \$129,692 has been approved for the work study program.

As an indication of the growth of work study, last fall 175 students were employed on the work study program. By late spring, the number had grown to 280.

Six hundred students were employed last fall on regular student labor. By spring more employees were added. A total for expenditures for student labor was over \$291,000. The students on work study earned \$84,000 of this.

Of course, as Miss Byron pointed out, there is a great cutback in the number of summer employees because of less need. However student labor at MSC is growing and will continue to expand with the college.

Ambassadors Leave For Host Countries

International crises play a part in a student's life, even at MSC.

Last spring it was announced that Jo Ann Montgomery and Bob Foster were chosen to participate in the Experiment in International Living Program. Jo Ann was to spend her two months stay in Switzerland and Bob in Israel.

Then the six-day war across the ocean erupted and Bob felt the repercussions of the crisis in Maryville. Instead of leaving for Israel, he left for Holland June 26. Jo Ann left July 1 for Switzerland.

From the Editors' Mail

Missourian Praised From Hawaii

Aloha:

The item by Marjorie Hitchcock, "Are Students Apathetic?" reminds me of a series near my laboratory on the University of Hawaii campus, "Don't despair or be filled with disgust. The road will be paved in August." Which August?

You have a good newspaper. The June 16 issue that just arrived on the last boat is an excellent example: Two front page items of real progress in creating an educational environment in which a student not only learns but appreciates what he is learning because it is meaningful to him. This you follow by two editorials on NWMSC students and faculty. Now don't despair. You have stated your case nicely. Be patient.

When the faculty creates an educational environment, the students will no longer,

can no longer, be apathetic. "English cannot be taught best by the lecture, memorize, and regurgitate method."

Remember your professors were reared in the time hallowed method of the lecture, and it will take time to change. It took me four years to even get the transformation started in my own courses from lectures to active student participation. Administrators are accustomed to recording letter grades based on each trivial detail of your classroom conduct. It will take them time to accept for-credit-only to satisfy requirements.

I am having a Golden opportunity working with the University of Hawaii as they start working toward a core liberal arts biology course for all freshmen. This is something the college at MSC already has. Since I am not on their

faculty I can take the part of defending the students. There must be something in a course besides sit, listen, look, and mark (X)s. Students need defending.

Your paper is the place to do it, also. Encourage classroom activities and exercises that permit the student to participate in his education. (By definition, it can't be an education if he doesn't participate in it!) Encourage the faculty members not to despair when they first offer such opportunities and students just sit there. It takes time for students to change, too!

After one year of reading your paper while on my research leave of absence, I am getting much encouragement. In the turmoil of things, change comes slowly. From 5,000 miles away it is quite measurable. The trivial detail gets lost along the way. NWMSC is now riding the wave leading to effective means in the process of educating.

It will need a good student paper to keep it there. Colleges are for students. Only your paper can make it that way. In such a college students are not apathetic. If the faculty and administration are moving ahead and you keep on the job, let's hope next year the student body will come to life.

I am still flying fruit flies and studying their behavior. Some progress is still being made in designing classroom exercises, mostly educational games. We continue to host all Maryvillians cast ashore on Oahu. It is a wonderful way to keep our tourist status for two years.

Aloha
Richard A. Hart, Ph.D.
Associate Professor
of Biology
(on leave 1966-1968.)

LETTER TO THE EDITOR

I would like to respond to the letter in last week's paper concerning the bowling alleys and billiard tables.

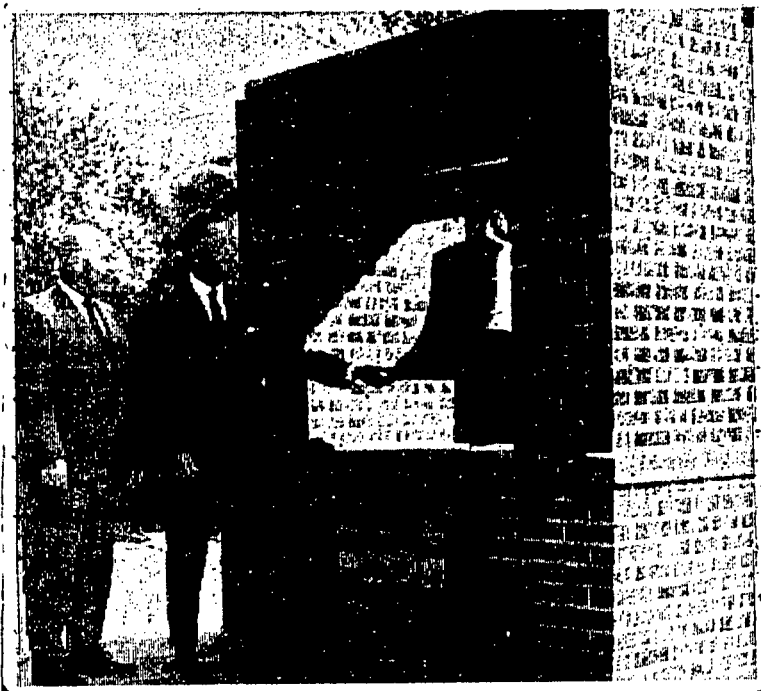

While I believe in the praise given to the Union for up-dating the recreational activities. I also would like to express some fear that leagues may monopolize the lanes.

Already faculty leagues are formed or in the process of being formed. Perhaps student leagues may be formed in the fall.

Where does this leave the individual or organization that wishes to use the lane for one night? Would it not be advisable to keep at least one and perhaps two lanes free for students not in leagues?

Why should a student be penalized when after a long day, he wants to relax and

Bell Tower Fund Grows

Chimes to Ring

President Robert P. Foster and Mr. Everett Brown discuss plans at the site of the Bell Tower which will be built over the the present "Bell of '48."

Alumni donations thus far for the 100-foot Memorial Bell Tower are described as substantial by Mr. Everett Brown, director of MSC Field Services.

Needed to complete the quota for construction, however, is approximately \$30,000.

President Robert P. Foster supplied the background reasons for initiating a Memorial Bell Tower. He commented that since money is supplied by the Federal Government for scholarships and grants, many of the faculty, alumni, and friends of MSC felt it fitting that a special memorial fund be established to honor the college's war dead, deceased alumni, and former faculty members, as well as living people deserving recognition.

As a result, the MSC Memorial Bell Tower fund became a reality, and the three-year

drive was initiated in May of 1965.

Construction will begin as soon as pledges have been fulfilled, with the structure to be in the design of the Administration Building towers. Placed on the present mall above the Bell of '48, it will contain a set of carillon bells which will be played daily at certain periods and on special occasions.

Progress on the Bell Tower memorial fund depends upon the gifts, contributions toward a memorial which will be an active part in the future daily life of the MSC student body.

"The response of the faculty, students, friends, and alumni of the college has been most rewarding," President Foster said. "The loyalty displayed has seemed indicative of widespread enthusiasm and acceptance of the project."

The Good Days...

In years to come, the open country will all be gone; All you'll see will be houses: The country will all be gone; The farms, the produce, the farmers will all be gone; In this changing world, the citizens' rights will all be gone; Isn't progress a shame?

... James Mathew Jensen

This poem clearly expresses the emotion I feel as I notice new buildings and Franken Hall with its carpeted floor and air conditioners.

Did you ever realize that older buildings have an air about them that none others have? You can even notice it in the older people who are successful. The feeling glows, "I am me. I have proven myself equal by just being here."

How the Administration building must have laughed when on the first Walkout Day, the teachers were left stunned and deserted. How it must have cried when Mike, the college dog, died and how Roberta Hall must have wept when the fire left her and her children wounded.

I remember the shower fight the North Second Hudson Annex had last year. We had to mop up that night but in the morning, streaked floors and fun filling memories remained.

Grumbling about inconveniences brought us together. We weren't content to stay in our own room and suffer alone, so we went out to meet people and complained together.

Buzzers rang loud and clear, so everyone pitched in to find the buzzed.

Progress is all right, but give me the good ole days when ...

Thank you,
A rememberer

Final Examination Schedule

Final examinations for the summer session will be held on Wednesday, Thursday, and Friday, Aug. 2, 3, and 4 on the following schedule:
